# User Guide Flick Picker

Team 7, 7eam  
Talha Asif - asift  
Jarrod Colwell - colwellj  
Madhi Nagarajan - nagarajm  
Andrew Carvalino - carvalia  
Ali Tabar - sahraeia

## 1 How to Use

Flick Picker is an easy to use web application, you first sign-up with either an email and password, or through Google authentication. After logging into the website for the first time you should click "Preferences" and set those to let us know which flicks to recommend. You can also add friends by going to "Social" and then creating groups and inviting friends to join them. After going into a group the owner can start a voting session, where our algorithm will provide flicks based off of every user's preferences' in the group. However, just because one person disliked a genre does not mean that genre will not show up, it depends on everyone else's preferences.

## 2 Video Guide

There is a full website tutorial provided [here](#).
